Re: Tissue Transglutaminase Antibody Reference Range Change

AML has received notice from Mayo Medical Laboratories (MML), that **effective October 14, 2008** MML will be implementing a reference range change for the Tissue Transglutaminase IgA & IgG Antibodies. This change is taking place to convert to a standard format for this assay.

The two AML test #/Codes that will be affected by this change are the **Tissue Transglutaminase IgA** (2993/TTA) and the **Tissue Transglutaminase IgG & IgA** (4888/TTG).

Current Reference Value:

- <20.0 U (negative)
- 20.0-30.0 U (equivocal)
- >30.0 U (positive)

New Reference Value:

Tissue Transglutaminase IgA

- <4.0 U/mL (negative)
- 4.0-10.0 U/mL (weak positive)
- >10.0 U/mL (positive)

Tissue Transglutaminase IgG

- <6.0 U/mL (negative)
- 6.0-9.0 U/mL (weak positive)
- >9.0 U/mL (positive)
